2004-05 Society President Ronald P. Vallort P.E. – Refrigeration Theme for this year -
"ASHRAE: The Strongest Link in the Cold Chain"

Presidential Article in Journal (partial copy):

"There are countries where, right now, up to 50 percent of the crops fail to make it to the first phase of the after-harvest food chain. ASHRAE must help to find ways to construct energy efficient, low cost refrigerated transport and storage facilities in countries ravaged by hunger.

"And we must remember that refrigeration has other uses besides food. Refrigeration is a vital part of the infrastructure necessary to deliver vaccines worldwide.

Thousands of lives around the world have been saved by vaccines for diseases such as polio, measles, chicken pox and hepatitis. Yet, as many as 3 million children die every year from diseases that are preventable with available vaccines. That's as if 30 jumbo jets filled with children crashed every day of the year."
